

## **Case study on Presentation of data**

Do the following operations on 'cars\_data' dataset:

1. Read the dataset to the python environment.
2. Check for the null values present in the dataset.
3. Plot a bar graph of male vs female buyers participated in the sales.
4. Find the top 5 cars based on their sales price.
5. Find the least 5 cars based on their Resell price.

Please note the following:

Give heading for each step you are doing.

Create a repository in GitHub account as "Public".

Upload the notebook file (.ipynb) to the repository.

Please make sure that you are uploading the notebook file including the outputs as well.

Share the link of this notebook from GitHub in the online text editor provided in Paatshala.
